Plastic Color Options

(not printing color options)

(effective 1-1-13)

CARTONPLAST (cartonplast) is an extruded polypropylene-copolymer sheet material with hollow corrugated flutes. This material is environmental friendly and can be recycled. Often referred to as "corrugated plastic".

SINTRA is an expanded-foam PVC (polyvinyl chloride) solid plastic sheet material, lightweight and reusable.

High Impact Polystyrene (HIPS) is a plastic resin used in the injection-molding of many products including our "most-durable" paddle. This material is highly impact-resistant, dimensionally stable, and resistant to chemicals.

Looking to make your paddles a particular color? Any of our White plastics can be printed both sides with any CMYK or PMS Process color!
